

BOBS STANDARDS MARK REGULATIONS

(sections 16 and 11(1))

(15th March, 2002)

ARRANGEMENT OF PARAGRAPHS

PARAGRAPH

1. Citation
2. Declaration of a standards mark

S.I. 13, 2002.

1. Citation

These Regulations may be cited as the BOBS Standards Mark Regulations.

2. Declaration of a standards mark

The following mark is hereby declared to be a BOBS standards mark that may be applied to any commodity falling within the standards specifications which have been set and issued in respect of that commodity,

BOBS Standard Mark (for Product Certification) is a stylised representation of a diamond with the acronym "BOBS" imposed (in Times Roman capital letters) on the lower part of the diamond.

CONSTRUCTION OF THE STANDARD MARK

The diamond consists of a **crown** and **base** each displaying five facets which are symmetrically constructed to the outer dimension of 5X (height) by 8X (length).

The **crown** is a set of five centrally aligned polygons with the height of 1X apart. The line 5X long is marked at points 0.5X and 1.5X from each end. The Line 8X long is marked at points 1X and 2.5X from each end. The ends of the two lines and the two sets of points are joined by straight lines.

The **base** is a set of five triangles made by locating a centrally aligned point 4X vertically below the 8X line, and joining that point to the 8X line at the ends and at points 1X and 2.5X from each end.

The size of the letters varies according to the horizontal length of the diamond. The height of the letters is 2X. The top of the letters is 0.5X from the 8X horizontal centre line of the diamond.

The lines shall be 0,1X thick.
